

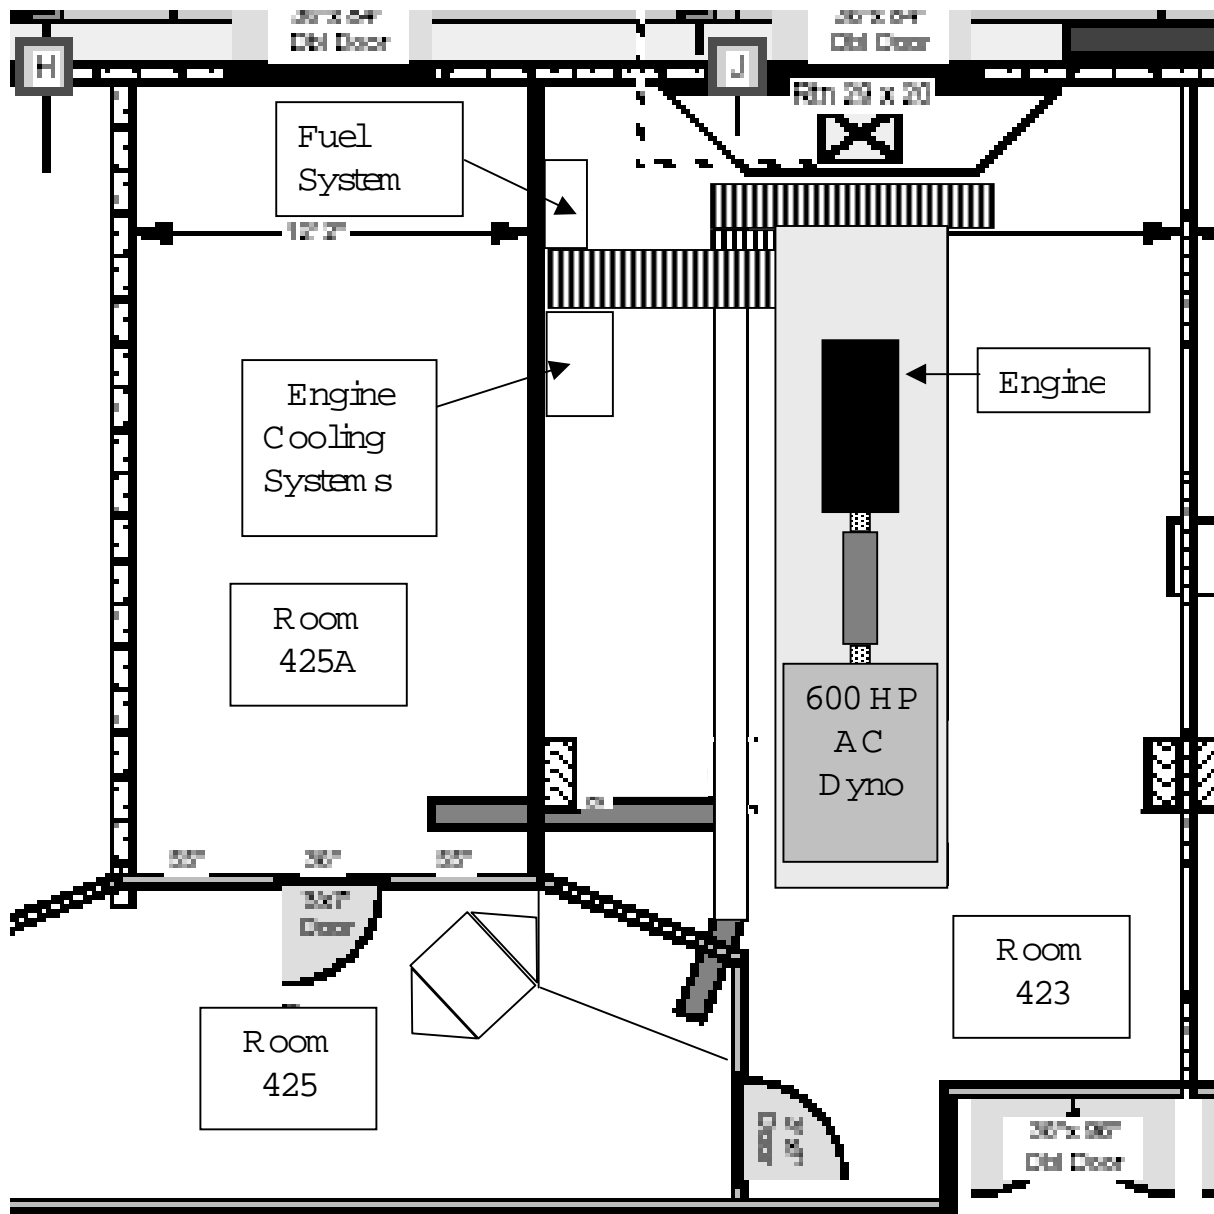

Figure 1. Engine Test Cell HD 5

Room 423: Engine Test Cell

Room 425: Control Room

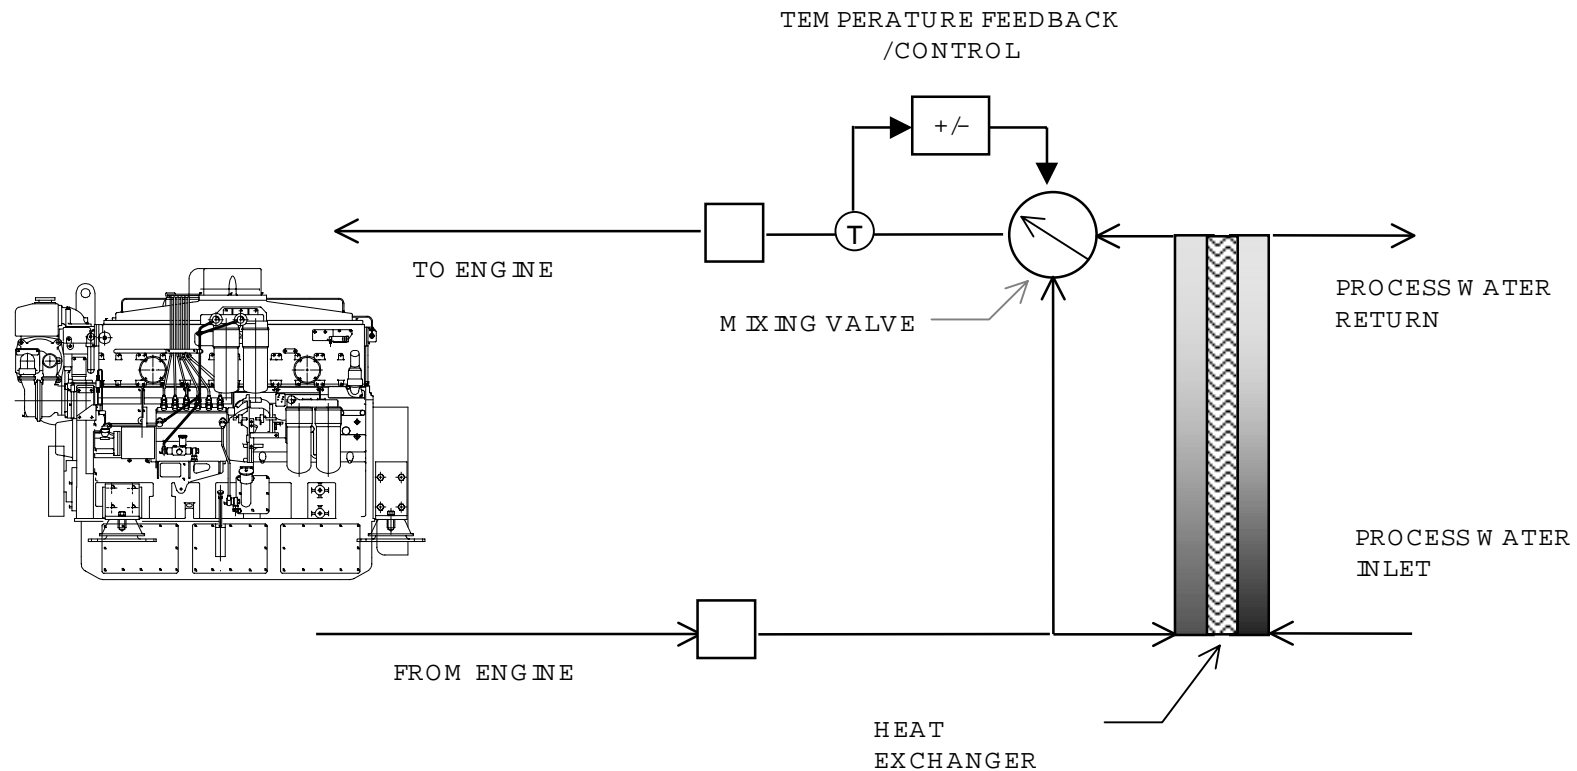

Room 425A: Equipment Room

Indicates trench location

Note: Process water supply and return will be available in close proximity to the indicated location for the engine cooling systems.

Figure 2. Jacket Water Cooling System – Concept Drawing for Temperature Control

NOTE: This drawing is intended to illustrate one potential concept for minimizing the effective thermal mass of the system while maximizing system responsiveness and accuracy. Other designs may have equivalent or superior performance and thus would also be acceptable or preferable.
